

# GUELPH PERMEAMETER ATTACHMENTS

2805D10 Ring Attachment, 10 cm

2805D20 Ring Attachment, 20 cm

## GUELPH PRESSURE INFILTROMETER RING ATTACHMENTS

### Model 2805D10 Ring Attachment, 10 cm

Model 2805D10 provides extended ability of the 2800K1 Guelph Permeameter to measure infiltration ( $K_{fs}$ ) and matrix flux ( $\emptyset_m$ ) in soils using a ring 10 cm in diameter for the retained pressure heads. For use in materials having hydraulic conductivities of  $10^{-3}$  to  $10^{-6}$  cm/s. Comes complete with replaceable Cutting Ring, Support Ring, Transparent Cover, and Installation Ring.

#### Specifications:

Head Height Range: 0 to 250 mm

Insertion Marking: 1 cm intervals, 5 cm maximum

Net Weight: 3.7 lbs.

### Model 2805D20 Ring Attachment, 20 cm

Model 2805D20 provides extended ability of the 2800K1 Guelph Permeameter to measure infiltration ( $K_{fs}$ ) and matrix flux ( $\emptyset_m$ ) in soils using a ring 20 cm in diameter for the retained pressure heads. Recommended for hydraulic conductivities of  $10^{-3}$  to  $10^{-7}$  cm/s. Comes complete with replaceable Cutting Ring, Support Ring, Transparent Cover, and Installation Ring.

#### Specifications:

Head Height Range: 0 to 250 mm

Insertion Marking: 1 cm intervals, 5 cm maximum

Net Weight: 7.9 lbs.
