

# TPS

# 90 SERIES

The 90 Series provides a complete measurement solution for several of the most important water quality parameters. It is perfect for rugged field applications in wet environments, rated to IP65.

The 90 FLT meter measures pH, ORP, conductivity, TDS, salinity, dissolved oxygen, turbidity & temperature.

The 90 FLMV kit includes the pH, ORP, conductivity/temperature and dissolved oxygen sensors (and all calibration standards).

The 90 FLT kit includes the pH, ORP, conductivity/temperature, dissolved oxygen and turbidity sensors (and all calibration standards).

To comply with GLP, the date, time and results of the last calibration are stored in memory, along with the unit's serial number. This data can be displayed or downloaded via a USB cable (optional).

90 FLT Kit  
(Includes turbidity sensor)

90 FLMV Kit

- Rugged and Waterproof
- User Friendly
- Sunlight readable screen
- GLP Compliant
- Automatic Datalogging
- USB Data Download (optional)
- Multiple Power Options

CERTIFIED
