

WP SERIES

Rugged and Waterproof
User Friendly
GLP Compliant
Automatic Datalogging
USB Data Download
(optional)
Multiple Power Options

The WP series is fully waterproof to IP67 and is designed for maximum durability for the harshest conditions. The WP Series is ideal for environmental field testing, laboratory and industrial use.

The WP Series includes 9 different models which cover a wide range of parameters and are available in kits which include your chosen sensors, buffers and standards.

Compliant with Good Laboratory Practices (GLP), the WP Series stores the date, time and results of the last calibration. Data can be recalled on the meter and downloaded to PC with the optional cable and WinTPS Software.

The WP-80D meter features dual pH/ORP channels.

The WP-80M meter is specifically designed for meat testing. It incorporates the Bendalls equation and the kit comes with a stab temperature sensor and a spear tip intermediate junction pH sensor.
